Behold the new TECNO Camon 11 Pro

ThatKING

I think it's better not to sugar coat words.

Since I have been making use of phones Tecno has been a the worst thing I have ever used.

I don't understand why a company that intends to promote her brands lie about her products specs.

**shiftback****Jimgym:**

Come to think of it, why is Tecno not making water resistant phones? just thinking o

It adds to the cost of making a device, and when TECNO is trying to make smartphone affordable as possible the last thing they'll want to do is raise the price with what i see as an unnecessary feature, unless you're careless that is

Camera & Photography Experience

Speaking of the rear camera setup, all three phones have a 50MP main camera. Both Samsung Galaxy A13 4G and Redmi Note 11 highlight their quad-camera setup with a 50MP main camera (F1.coool, a 2MP macro camera and a 2MP depth sensor. Whatâ€™s different here is that Samsung Galaxy A13 sports a 5MP ultra-wide camera with a 123-degree viewing angle; while Redmi Note 11 is equipped with an 8MP camera with a 118-degree angle. TECNO SPARK 9 Pro, however, has the triple rear camera layout with a 50 MP main camera, 2 MP in-depth sensor and an 8W AI Lens.
